

p. 164

Normal faults tension pulls plates
apart (divergent boundary)

reverse faults compression pushes
plates together (convergent)

Strike slip faults shearing causes
plates to slide past each other (transform)

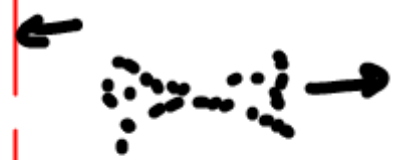

- Earthquake Foci Arrangements

Convergent boundaries

Divergent Boundaries

EQ. Foci	 <p>ocean Cont</p>		
Stress	Compression	Tension	Shearing
Boundary	Converg.	diverg.	Transform
Fault	reverse	Normal	Strike slip
