

4 types of Volcanoes:

Picture

Shield volcanoes - wide, shaped like shield, - Basaltic magma

↓ viscosity - ↓ H₂O

Cinder Cones - Tall & Thin
- granitic magma
- ↓ H₂O

↑ viscosity

Composite volcanoes -
(Strato)

explosive!

- mountains
large

- granitic magma

↑ viscosity

↑ H₂O

Lava Plateaus -

like shield volcanoes

↓ viscosity

basaltic magma - runny

↓ H₂O

Landforms from Magma

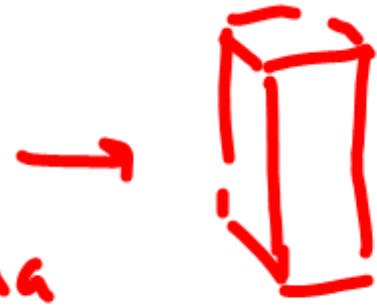

Caldera - extinct volcano
forms crater on top
filled w/ water

Volcanic neck - hardened
Volcanic pipe -
inside of volcano
left over.

Dike - vertical
hardened magma
intrusions

Sill - horizontal

Batholith -

magma chamber under
volcano left over after
surface volcano eroded

Dome Mountains.

hardened magma chamber

Hot Springs -

interaction of heated magma +

Geysers -

H₂O

expands - steam
